Monitoring and Evaluation

COMPANY PROFILE 2026

Field Intelligence for Complex Environments

Independent monitoring, evaluation & field intelligence for high-stakes decisions in fragile and conflict-affected states.

www.me-axiom.com | info@me-axiom.com | Est. 2012 | UNGM 540038

Who We Are

Established 2012 · registered in France, Kenya, Yemen & Somalia

01

Axiom Monitoring & Evaluation is the **field-intelligence infrastructure for complex environments**. Since 2013 we have pioneered large-scale third-party monitoring in hard-to-reach areas — trusted by **UNICEF, the European Union, the World Bank, FCDO and DANIDA** for over **350 consultancies** across Somalia, Yemen, Sudan, Ethiopia, South Sudan, DR Congo and Kenya.

We combine deep local networks with international methodological rigour. Our approach is evidence-based, participatory and contextually grounded — moving beyond theoretical frameworks to deliver practical, actionable insight from the field.

Our core specialties are **third-party monitoring, evaluations, applied research, context analysis, household surveys, data management and advisory services** — delivered where direct access is hardest.

MISSION

Rigorous, evidence-based M&E that strengthens accountability, improves programme effectiveness, and builds local capacity in the world's most challenging environments.

VISION

To inspire innovative approaches for positive change through the highest standards of independent evaluation and field-based research.

“Every finding is traceable to its source — a photo, a transcript, a dashboard cut, or a geo-referenced submission.”

What We Do

Ten integrated service lines across the MEAL cycle

02

Third-Party Monitoring

Pioneers of TPM in hard-to-reach areas since 2013 — 250+ projects, \$1B+ portfolio.

Learning Assessments

Turning M&E evidence into structured learning — AARs, outcome harvesting.

Surveys & Evaluations

Baseline, mid-term, endline & final evaluations on OECD-DAC criteria.

Data Analysis & Viz

SPSS, STATA, R, Python, GIS, SNA and interactive Power BI dashboards.

Applied Research

Operational & formative research to peer-review standards under real constraints.

Context Analysis

Political-economy & stakeholder mapping, conflict sensitivity, Do-No-Harm.

Assessments

Rapid & in-depth needs assessments — MSNA/MIRA, JIAF, sectoral diagnostics.

Capacity Building

M&E systems, tools & financial-management training for ministries & partners.

PDM & Feedback

Post-distribution monitoring & always-on CFRM — call centre, IVR, WhatsApp.

Advisory Services

Strategic, field-grounded guidance — practical and feasible, not theoretical.

Sectors of expertise

Health & Nutrition

WASH

Education

Child Protection

Cash & Voucher

Food Security

Governance & Peace

Emergency

How We Work

A disciplined six-phase methodology with real-time quality assurance

03

Quality assured in real time — not after the fact

Axiom runs a strict, built-in QA system in which field data is **verified and validated** as it is collected:

- ✓ Digital capture with in-form validation & skip logic (Kobo/ODK)
- ✓ GPS, timestamp & audio-audit checks on every submission
- ✓ Daily supervisor back-checks & high-frequency-check flags
- ✓ Automated outlier & completion-rate dashboards

Enumerators, supervisors, Axiom management **and the client all access the same live dashboard** — real-time visibility and joint oversight, so errors are corrected *during* collection.

What sets us apart

- Access where others cannot go.
- Traceability of every datapoint.
- Rigour — defensible sampling.
- Independence — true third party.
- Languages — field tools in 11.

Axiom field & data team — joint review of live collection dashboards during a survey round.

The Platform

Real-time data assurance & interactive analytics — proven, not promised

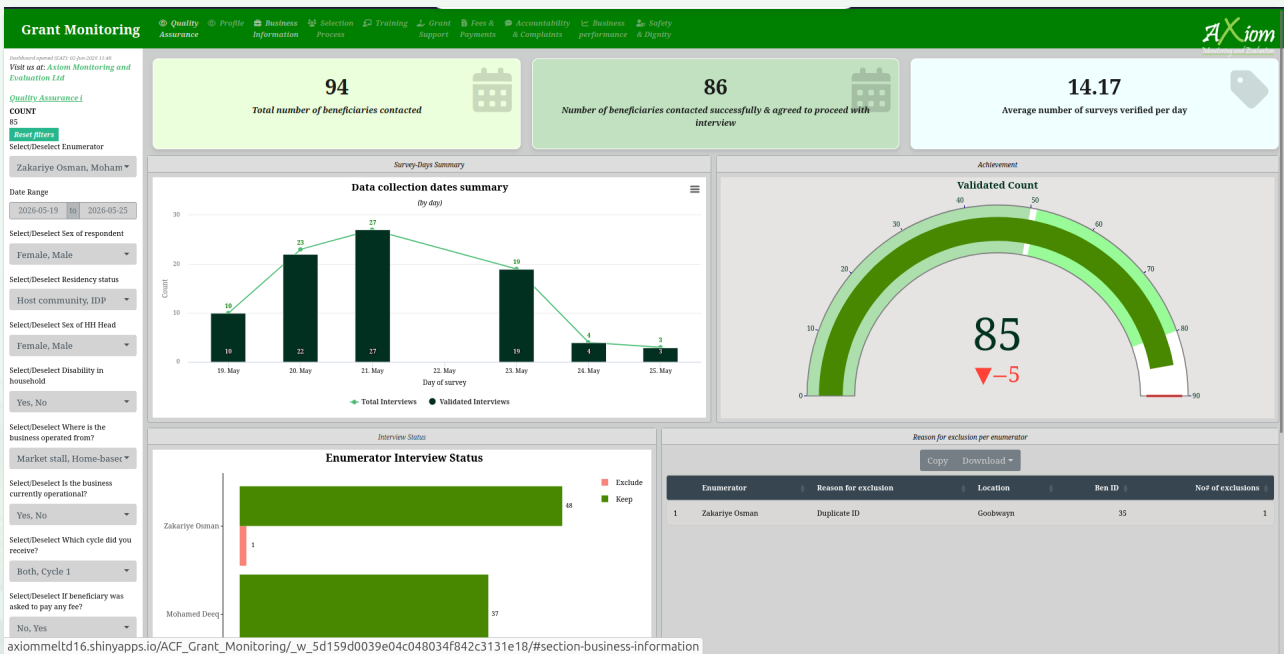

04

From submission to insight

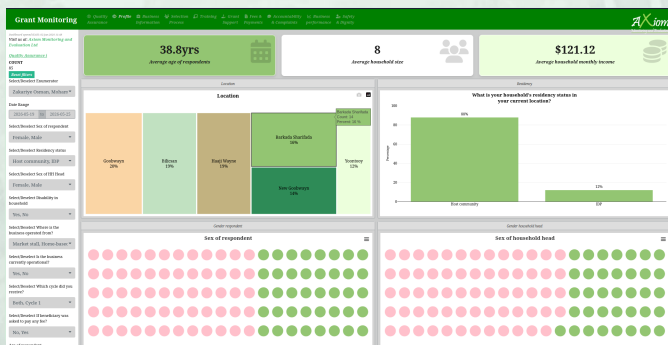

Geo-referenced submission > automated validation > daily QA dashboard > live analytical dashboard > client decision. One continuous, auditable chain.

Axiom converts complex field data into simplified, decision-ready analysis delivered through **creative dashboards, interactive maps and virtual field visits**. Our analysts work in SPSS, STATA, R, Python and GIS, layering statistical analysis, Social Network Analysis and triangulation over desk review.

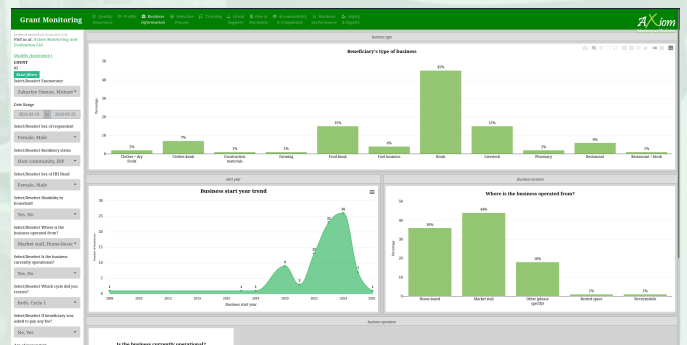

The same platform that **assures data quality in real time** also serves the client a **live analytical product**: KPI cards, demographic and trend charts, geo-coverage maps and enumerator-performance monitors — filterable on demand.

Real-time data-collection QA dashboard — surveys contacted vs. verified, validated-count gauge & live enumerator interview-status monitoring (genuine Axiom deliverable).

Interactive analysis dashboard — KPIs, demographics & trends.

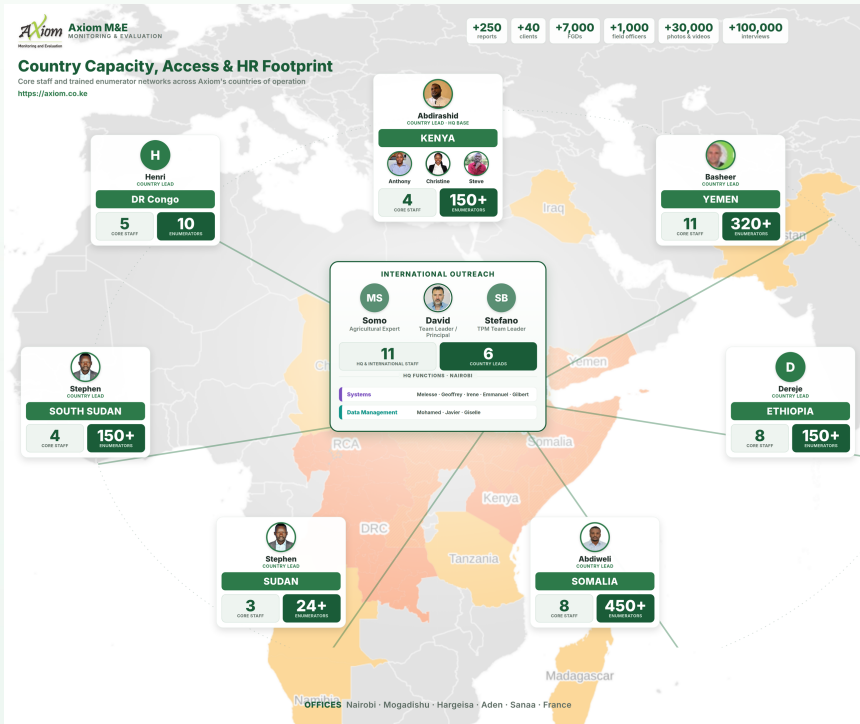

Geo-spatial & thematic analytics with live filtering.

Where We Work

Deep field networks across Africa & the Middle East

05

We specialise in **hard-to-reach and conflict-affected areas**, with standing teams and trusted enumerator networks built over a decade of continuous field operations.

Countries of operation

WORKING LANGUAGES

Community consultations · livelihoods & food-security assessment · access in arid, remote terrain.

★ Selected Experience

A sample of recent assignments across our core markets

06

UNICEF

Yemen · 2023–26

Scale-Up Evaluation — Minimum Service Package

Health-system scale-up across 10 governorates & 40 districts in active conflict; GIS mapping of 79+ facilities.

🏗️ 10 governorates · 175 KIIs · 80 FGDs

UNICEF

Ethiopia · 2022–23

Nationwide Third-Party Monitoring

Independent verification across all regions — health, nutrition, WASH, education & CP — with live Power BI reporting.

🏗️ 30 staff · all regions · 5 sectors

World Bank

Somalia · 2023–24

Urban Investment Household Survey

Randomized-walk sampling in Baidoa & Garowe with daily real-time QA dashboards.

🏗️ 2,000 households · 24 enumerators

IOM (USAID/BHA)

South Sudan · 2022

Mid-Term Multi-Sectoral Evaluation

CCCM, health, shelter/NFI, MHPSS & WASH across Bentiu, Wau & Malakal.

🏗️ 384 interviews · 26 KIIs · 9 FGDs

ACF

Multi-country · 2025

Multi-Sectoral Nutrition Evaluation

Simultaneous evaluation across Somalia, South Sudan, Ethiopia & Uganda on OECD–DAC criteria.

🏗️ 1,500 HH · 98 KIIs · 24 FGDs

EU / ECHO

Yemen · 2017–22

Humanitarian Portfolio TPM

Multi-year independent verification of the EU/ECHO portfolio with live dashboards.

🏗️ Multi-sector · 5 years

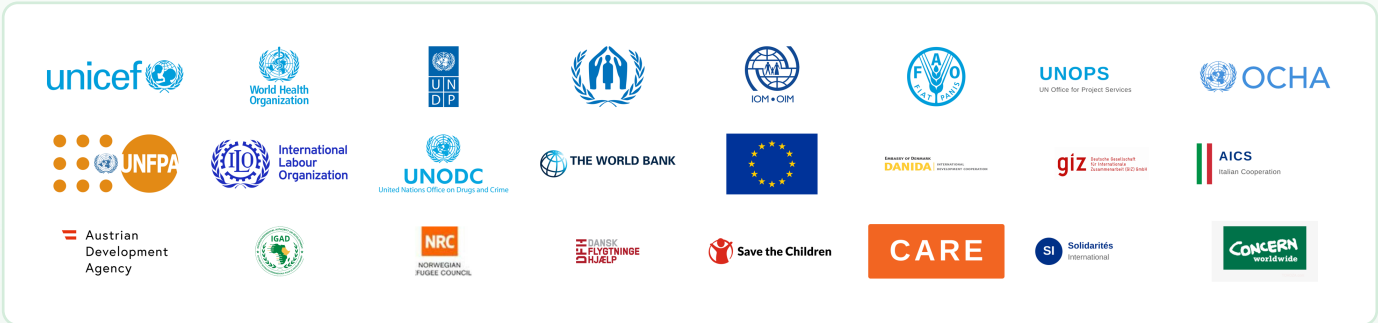

Further assignments include **Concern Worldwide** (SAGAL social transfers, 18 districts, Somalia), **UNOPS** (Somalia, sensitive non-lethal equipment TPM), **Solidarités International** (RRMP audit, DR Congo), **International Medical Corps** (GBV evaluation, South Sudan) and multi-cycle **UNICEF** PDM in Sudan.

Trusted By

40+ UN agencies, donors and international NGOs

Why Axiom

- Proven access** where others cannot go — a decade of continuous operations in fragile states.
- Real-time quality assurance** — data verified & validated as it is collected, on a shared live platform.
- Full traceability** — every finding linked to a photo, GPS point, audio audit or transcript.
- Methodological rigour** — defensible sampling, OECD–DAC standards, publishable-grade analysis.
- Independent & accountable** — third-party verification free of conflict of interest.
